From: n0oks
Topic: 1 Message: 1

Well folks, here is where you can post messages about my program.

2. Hi Mike

Yahoo group: paperchaserslog
Date: 2003-04-15 15:07:22 UTC
From: Russ
Topic: 2 Message: 2

Well just found out about this newsgroup, hope is all going well
with PCL.
Question: Is there any way I can select on entries and print off my
contact info? I need to also print labels for only a select few of
the IOTA contacts I've had. Tried to use print current but everytime
I try to print anything a blank page print off!!!!
Any ideas?
73, Russ K9DXR

Russ,

I am sure you selected a label type, because you can't print a label until you do. The label, either QSO or address or both will be printed for the QSO in the edit area. However, you need the name and address file to print addresses. This file is calls.dat. If there is nothing in the large rectangle on the edit area, then there is no address for the QSO. The labels will not print until the page is full, you force the program to print the labels, or you exit the program.

If it was QSO labels you were trying to print then you have me stumped. Let me know.

Currently, you have to print labels one at a time. Would it be helpful if I put in a screen where you can select a beginning and ending date and labels for all QSOs between those dates would be printed?

Mark

Mark, what I was looking for was a way to hold down the control key and scroll through entries and select certain contacts for label printing. I do choose the label as 1x4 begining label 1 ending 20. I use NetLogger for the Nets I run and it has this feature but I don't like it for everyday or DX usage.It has the callbook lookup feature for QRZ CD which helps for the first time check ins. If I remember right DXLog had the feature of tagging QSO's for label printing either all unsent QSL's or manually print them one at a time, and then deleting the tags all at once when printed or not. I can print through PCL one label at a time but not a whole page of labels as needed.Thanks again.Russ K9DXR

From: Mark Kachel
Topic: 5 Message: 5

Russ,

I am puzzled why you can't print a whole page at a time. Do the labels print as soon as you select them?

As for ease in selecting multiple labels at a time, that could be improved. I will see what I can do.

Mark, N0OKS

From: Mark Kachel
Topic: 2 Message: 7

Russ,

You can either click or double click on the top area of the form where the QSO data is shown. Currently clicking causes the QSO to show up in the bottom area. You can the double click to request a Label and another box pops up for QSO, address or both.

The question is: Do you want to click to edit a QSO and double click to get a label OR click to get a label and double click to edit? Your call. Gets put in next release.

11. importing DOS DXLOG to paper chaser's log

Yahoo group: paperchaserslog
Date: 2003-07-10 14:52:17 UTC
From: ve2bjh
Topic: 11 Message: 11

I am using DXLOG and DXCLUSTER DOS for a long long time.
I downloaded Paper Chaser's Log , recently and
impored my .DBF file in paper chaser log and have a lot of
pleasure.

I have resize all the fields to my taste. Close the program and
when i run it again all fields return to there initial positions.

What am i doing wrong? Thanks Pierre VE2BJH

P.S. Is there any project to implement frequency reading
to the radio and rotor heading control and dx cluster ?

12. Paper Chasers' Log

Yahoo group: paperchaserslog
Date: 2003-07-10 17:57:25 UTC
From: Mark Kachel
Topic: 12 Message: 12

Pierre,

Currently, the program does not keep track of changes to the widths of the fields. Hence, they will be the default width when you start the program. Would you like me to make some of the fields wider or narrower?

Paper Chasers' Log is just a stand alone QSO logging program. There are many, outstanding rig control programs available, that are far better than what I could write.

Please let me know if you have any other suggestions for improving Paper Chasers' Log.

Une question. Comment dit on Paper Chasers' Log a Francais?

From: James Fuller (N7VR)
Topic: 18 Message: 18

Hi All,

Currently the program in being analyzed for upgrading. The following enhancements are making the top of the list.

1. To be able allow more than 100,000 log entries, we are looking to move to a small database operation.
2. Reading from radios is being looked at.
3. Separating screens and making them resizable are not on the list.

We are currently putting together a wish list to work from. Please post anything you would like us to look at.
Hopefully, we can keep this a s a good and functional program.

Hi John,

You must have the unzipped NA.Dat and ZIP.DAT files in your Program Directory.
Then use Setup>Select Callbook Source like this:

This will allow only US Call signs to be looked up.

Subject: Thanks

I got the file, downloaded it finally, and got it running.
It does not have that message "50 qso's" anymore.

I also downloaded the NA file from the website; but,
I am having trouble with that one. It does not seem to
work for some reason.
Is there a switch to turn it on somewhere.
I have tried several calls and the information just does
not appear in that info box?

Thank You very much for the use of the program.
If you are ever in the Raleigh,NC area, call me and I
will take you out to lunch or whatever.

From: g8gni
Topic: 18 Message: 20

Hi

I originally registered my copy of PCL but lost the registration file when I had a disk crash. I read on the web site that the program is now free and that there is a buildini.exe file somewhere so that one can generate ones own .ini file to remove the 50 QSO limit.

Any ideas as to where that file is please? I can't seem to find it.

Cheers and 73

Andrew M5AEX / G8GNI

23. Status Report and Question

Yahoo group: paperchaserslog
Date: 2006-01-23 05:39:12 UTC
From: James Fuller (N7VR)
Topic: 18 Message: 23

Hi All,

As I have been having fun with the upgrade of PCL, I ran into a question.
How many of you are running this on a Windows 95 Machine?
If you are, please send a note back to the list.

The current Visual Basic I am using will work on Windows 98, Windows 2000,
Windows XP, and the new Vista.
I will not support Windows ME, as it has been shown very unstable :(

Also, I would like a few that would not mind testing some of the
improvements.
Please understand that you must use copies of your data as there could be
data loss during the tests.

I hope to place a status update, once per month on here.
However, they may be timed sooner as things progress and warrant.

I am converting the storage of the log at this time. I have well over
100,000 entries, myself.
I noted that I add a large number from each contest and qso party and group.

Geritol Net: They have a requirement to have the frequency on the QSL card.
Currently, the program does not meet this. I am adding fields
to correct this.

Thanks to all for helping with this conversion.

What method is being employed to alter the ADIF file generated by ACLogger and NetLogger to get the data fields in the right order to import into PCL. It appears that both of the logging programs use some customization in their individual databases. This needs to be a fairly simple procedure that can be repeated at least weekly without consuming a large block of time.

Hi Richard,

Thank you for your email. I would suggest you subscribe and send these suggestions via the Paper Chasers Group at Yahoo Groups.
I am currently posting progress reports there.

Currently, There is no fix for the problem you are describing. PCL does not store the address information.
PCL instead, depends on you having a call sign database or a subscription.

One of the changes being worked on is the change over to a Database system, rather than the flat file that is currently used.
This will allow us to add features like address storing. It should overcome the loss problems I have found on a few awards.

PCL will also get an ADIF upgrade to the current version two specification.

It is taking time to design and build the tables with populations and update mechanisms.

Subject: Paper Chaser's Log

I had a subscription to Ham Call for a while. I let it lapse. When I did I realised that each time a log entry was called up, the on line Ham Call database was accessed for an address. Now that I have let the Ham Call lapse I have lost all the address information from the log. None of it is left. I realize that I could resubscribe or look them up individually on QRZ or other service, but I wanted to keep the address information from when the contact was made. I can always look them up again if they move. Is there a way to store the database information when it is looked up. Sometime when the information is lost I also loose the award entry data from the contact. I have lost IOTA data on several contacts now. Is there a fix?

The fix may be to copy the entire database onto my hard drive in the future. I have high speed cable modem Internet connection, and the on-line database access was very fast leading me to mistakenly think on-line only was ok.

30. April Report

Yahoo group: paperchaserslog
Date: 2006-04-12 16:34:12 UTC
From: Jim Fuller (N7VR)
Topic: 28 Message: 30

Hi All,

I have, finally, found another ATU (Amateur Time Unit) to post a status on the future of Paper Chasers Log.

Database:
I have gotten the Database section working and pre-tested.
I am adding new modes to the list.

Interfaces:
I am working on the Radio interfaces, and the K1EL CW Keyer Interface.
I have Kenwood and Yaesu Radios, but will need assistance testing ICOM interface.
(Maybe one day I can afford a 756Pro3 or 7800 ;-)

My current goal is to have an stable release ready for the Lighthouse events later this summer.
The base changes have been interesting, but will provide a better future foundation to build on.

I am still looking for suggestions and volunteers for testing.

Always available to torture test, push to the limit, or otherwise try
to find a soft sport if it will help the final result.

Have you given any thought to making the core program as spiffy and
as encompassing as possible, given the different awards programs.

Making the award stuff available in "modules" that could be
downloaded and added to the end-users specific requirements.

Seems a little funny to have to have all of the European contests you
never enter, the RTTY contest you never enter, etc.

Hi Robert,

That is one of the reasons to go to the database system for Paper Chasers
Log.
We can modulize it and keep it fast at the same time.

BTW, Why do you not enter the European awards?
I find them fun to track down :)

Also, Please remember this is an award program, not a contest program.
Tom Wagner (N1MM) programs a great modular contest program.
It can be found at http://www.n1mm.com/

Lastly, could you please sign your name to emails here ?
I like to know the name and call of who I am talking with.
I do not like having to use my FCC database to lookup their call :)

From: WA7HYD
Topic: 28 Message: 33

My main interests are to collect, states, countries, counties, grid squares, prefixes, etc., mixed band and single band, SSB, RTTY and PSK31. The awards from different sponsors of these achievement programs are more evenly attainable.

There is no way that I can compete against the big guns and semi-pro stations for point total type awards, but I have just as much fun if not more.

I upload to eQSL after each contact and LoTW as part of the shutdown procedure daily, mainly to get those verifications to those who need that mode of verification.

unless they have changed the software the 50 qso's is correct you
need to go back on line to the PCL website and see who is taking care
of the register fee's now that Mark is not supporting the program. I
have forgotten who took it over. very good program. it is Drew's old
DX LOG revised.

Hi Stewart,

I am assuming your are talking about the DXCC changes.

You can modify the DXCC.DAT File. If you look under HELP>DXCC.DAT, you
should find what you are looking for.
I do not plan on releasing an update until the database version is
released. I am finishing up on the import routines for updating the
database on changes.

Please address these question via the paperchaserslog group on yahoo.

> Dave KA2CYN
>
>
Hi Dave,
You did not mention what operating system you are operating under.
I will assume Windows XP or 2000.

The INI files must be in the directory it was installed into.
The registration key is in the INI files.
The program registers with the operating system, as to drive and program
location.
If you wish to backup to another drive on the same system, PCL will only
work after being restored to the proper location.

A second note, You need only backup the data files. (eg: qsodata.*,
*.dat, *.ini)
You should install the program and restore the backed up data files.

This is not a contesting program. It is permissible to work the same station many times.
If you in inadvertently log the same station at the same time and strength, then just delete the second entry.

Secondly, Please sign your posts with your name and call sign, it is only polite.

From: one_cw_ham
Topic: 44 Message: 44

Hi Jim,

I have been playing with PCL off and on for about a year now, I got the original version and the builkey module from Mark last fall. I had visions of modifying the report module, or creating my own, specifically to fit my QSL cards. Well, that didn't happen, along with the 2000 other things I plan to do.

So my question is this, is the Install.exe file on your web page the latest and greatest? Also, will the buildkey module I have now work with your latest version, or do you need to assign a new license?

73,
Brian
WB9TPA

From: Jim Fuller (N7VR)
Topic: 44 Message: 46

Hi All,

Well, this has been a interesting experience, so far.

1) I found I had a few more things that had to be done to support the program.
I had to write and debug the FCC data base portion to be able to get support
information, Still working on the Canadian Part :)

2) I had a legal challenge to negotiate in regards to PaperChasers Log that was from the past.
We came to a good agreement. It appears, that I can move on now.

3) I still have no one who is willing to assist with the testing on the radio connections,
so I will only be supporting what I can test here.

Hopefully, I can get this out the door shortly.
I did not realize what I had volunteered for, but am enjoying the fun for now :)

50. PCL

Yahoo group: paperchaserslog
Date: 2007-01-20 15:47:46 UTC
From: rossw6fg
Topic: 15 Message: 50

Hello All,

Does anyone really read these posts anymore?? I hopped on the PCL train and downloaded the program. I'm not sure if it'll hold more then the 50 Q's. What should be my next move? Is this program worthy of me crunching in all my years of papper logs? Is this a good program for day-to-day operation? I've tried LOGic7 but I just don't need all the bells & whistles that the big name programs have and I'm not 'controlling' my radio with the computer either, I just like chasing CW awards. Thanks for any replies.

73, Ross W6FG

Yes,

At least one does read these messages.
Paper Chaser log is currently being rewritten. I got into this and found may areas that needed updating. So I have been putting a lot of my spare time into a rewrite.

If you send an email to n7vr@... and request it, I will send you a registration file for free.

As for suitability for your purpose, that is for you to judge. But there is only the cost for entry to make that judgment, no cost to the program.

59. Lost Data

Yahoo group: paperchaserslog
Date: 2007-04-11 22:53:17 UTC
From: ka2cyn
Topic: 59 Message: 59

Today I lost all the data in PCL on my desktop.(running Win XP) Over 15,000 qso's gone. I am lucky thatI had most of this backed up on my laptop. I exported my laptop files to my desktop.
After that process, I noticed that there were 3 PCL's in my desktop tool bar. One of these was the blank and the 2nd had my updated file.
I couldn't bring up the third one.
I closed out the 2 that I found.
Now the PCL shortcut takes me only to the empty copy.
Any ideas how I can recover my "lost" files & stabilize them would be appreciated.
73, Dave KA2CYN

From: Jon Ermels
Topic: 63 Message: 64

Bruce, I had trouble doing that too and I'll try to remember as close as I can what worked.

Tell it to export an ADIF file and when the box opens type in your file name in the box such as pcl.adi, NOT adif.

You will be able to see it then in the Program Files folder.

MERRY CHRISTMAS

68. Information entered into PCL not being held in the programme, after you exit.

Yahoo group: paperchaserslog
Date: 2008-09-05 17:43:15 UTC
From: g0thf
Topic: 68 Message: 68

Has anyone had the same problem. When you enter ??/GoTHF/M or P or MM
It shows ok in the programme until you exit / quit.

When you open the programme later, those type of entries revert or
change back to - M or P or MM or ??

Any help would be greatly received.
I have been a registered user for several years and have experianced
the same problem for most of that time.

Thanks
Keith G0THF

69. Re: Information entered into PCL not being held in the programme, after you exit.

Yahoo group: paperchaserslog

From: Tom Graham
Topic: 68 Message: 69

Keith -

I am having the same problem. I enter (for example) PJ2/OH2BSS. The program accepts it and shows it entered correctly. But when I start the program the next time all it shows in the log is PJ2. It seems that the program accepts entries with "/" in them but only writes to the log file that portion in front of the first "/". Hopefully this is a but that can be fixed easily.

Thanks for the update, Jim. Sorry to hear about the weather station.I quite listening to our weather station.very unusual weather here (and it ain't a WARMING climate!). Had to water the cactus during the summer, very little rain. And now we've had snow 2 times in a three day period. This place hasn't seen anything like that for 30 years. No tire chains in this town.

Anyways, glad to hear that you DO have a job. Quite a few looking for jobs these days. I'm retired, so keep working and putting that money in Social Security!

73 and Merry Christmas & Happy New Year to you and yours.

Subject: [paperchaserslog] Stagnant?

Is anything being done to update the PCL? It is a simple but very good program to track quite a few items concerning either net or personal contacts. I emailed Jim, N7VR, a year or so ago and he said he was working on some upgrades.nothing since then. I also noticed that his web site is not being updated.his last local weather report was on 1 April 08!

73,

Charlie W5NMX

Hi Ed,

It is a 32 bit program. It may work on the 32 bit version of Windows 7, but it will not install on the 64 Bit version. I have an alpha version done for 64 Bit/ 32 bit that uses dot net technology. As work allows, I hope to have a beta ready for release. But somebody is going to have to redefine recession for me:-) Ever since they started saying that we are in one my work has been very busy.

If Paper Chaser's Log was installed with default settings, then you should find THE PROGRAM in the following path.

c:\Program Files\N0OKS software\Paper Chasers' Log\

The QSO information is in the qsodata.dat file.

You can create a short cut from the PCL.exe that is in that directory and then cut and paste the short cut to your desk top.

The PCL program should, also, be in your programs under the start tab.

Hi Jim,Tnxs for the quick reply.Well I found the program files.Open N0OKS paper chasers log up.Found the qso data file and it reads 0 KB so that must mean it is gone.So does that mean I have to redo all of the qso's again.hihi sounds like it to me.Is there a way on the program to back up??or how do I back it up.My other logs that I use for other awards have backup.Man that just makes my day.again thxs 73 Dave

83. Updating to Windows 7 64 bit

Yahoo group: paperchaserslog
Date: 2011-03-02 07:46:36 UTC
From: g0thf
Topic: 83 Message: 83

Is there any more news on up dating PCL to work on Windows 7 - 64 bit?
Currently on my new machine I cannot use PCL as it is 64bit.
I miss PCL greatly as its a great programme to use.
Thanks Keith G0THF

84. PCL Version Question?

Yahoo group: paperchaserslog
Date: 2011-09-07 03:41:14 UTC
From: Todd
Topic: 84 Message: 84

I recently had to reload my XP computer, so copied he N0OKS folder to a 8GB USB memory stick, then loaded it on the repaired computer. It would not work because it was missing a DLL file. So, had to download PCL and install from scratch to get it to work. The version I downloaded was older than the version on my memory stick. So just replaced the now working PCL application file with the one on the memory stick and all is well. Now for my question...What is the latest Version of PCL ?

Downloaded 2.0.40

I have 2.0.46

If anyone has a later PCL Application file, please let me know.
